WORK EXPERIENCE

Java Development Intern

Aug 2023 - Sep 2023

Nashik, Maharashtra

- Developed Java applications and implemented new features under the guidance of senior developers.
- Collaborated with the development team to troubleshoot and debug code issues.
- Participated in code reviews to ensure adherence to coding standards and best practices.
- Assisted in the design and implementation of database structures and queries.
- Worked with APIs and third-party libraries to integrate functionality into Java applications.
- Documented project progress, including code documentation and technical specifications.
- Demonstrated a strong understanding of object-oriented programming principles and design patterns.
- Continuously learned and stayed updated with the latest Java technologies and industry trends.

PROJECTS

Restaurant Web Application

- This project is completely based on Java Enterprise Edition (JEE) which is a web application.
- The Restaurant Web Application is a Java-based project developed to provide a user-friendly and interactive platform for managing restaurant-related activities.
- The project follows the Model-View-Controller (MVC) design pattern for a structured and organized development approach.
- It has been designed in layers (Controller, Service, Dao, Model) which makes it more efficient and maintainable.
- Restaurant Service: Manages restaurant-related functionalities such as menu items, orders, and reservations.
- Testimonials: Allows customers to leave feedback and testimonials.
- Admin Panel: Provides administrative functionalities for managing users, menus, orders, and other aspects of the system.
- Login/Logout: Facilitates user authentication and session management.
- Change Password: Allows users to update their passwords securely.
- Contact: Provides contact information and a form for customer inquiries.
- Table Booking: Allows users to reserve tables at the restaurant.
- About: Displays information about the restaurant, its history, and mission.
- Menu: Shows the restaurant's menu items categorized by type.
- Chef Team: Introduces the chef team with their profiles and specialties.

My Portfolio

- This project is completely based on Java Enterprise Edition (JEE) which is a web application.
- It has been designed in layers (Controller, Service, Dao, Model) which makes it more efficient and maintainable.
- It has secured admin panel with login and logout functionality.
- It can handle faulty inputs or malicious entries from end user by using proper validation in service layer.
- Admin can perform CRUD operation in order to add education, experience and other details and also can accept enquiries from the end user.
- HR can see complete details about the candidate and he can contact from the contact page and can also download the resume of the candidate in pdf format.
- Admin can upload and delete the resume.
- It has been built on MySQL database.
